Remove passenger side panel from console to access BCM

Remove green connector from BCM. Connect Green wire to Gray/Green Wire Pin 9

Note: If Wire is not present, release retainer to insert Brown harness to Pin 9. Then connect to Green Wire

Connect ground wire to framing of center console.

Connect Blue Wire to Violet/Yellow Pin 5
Do not drill hole for control switch before testing the cruise system.

Mate wires color to color from switch harness to cruise harness connector.

Use the lever wedges on the Control Switch at an angle template to drill a 3/8" or 9.5mm hole.
