Legend

STOP: Damage to vehicle may occur. Do Not Proceed until process compliance has been met.

OPERATOR SAFETY: Use Caution to Avoid Risk of Injury.

CRITICAL PROCESS: Proceed with Caution to Ensure a Quality Installation. These points will be audited on a completed vehicle installation.

GENERAL PROCESS: This highlights specific processes to ensure a quality installation. These points will be audited during the accessory installation.

TOOLS & EQUIPMENT: This calls out the specific tools and equipment required for the process.

REVISION MARK: This mark highlights a change in installation with respect to previous issue.

WARNING: DO NOT USE HAND-HELD 2-WAY TRANSCEIVERS INSIDE YOUR VEHICLE WHILE DRIVING.

WHEN TRANSMITTING FROM INSIDE THE CAR, 2-WAY RADIOS THAT OPERATE IN THE 25MHZ-700MHZ FREQUENCY RANGE WITH MORE THAN 2.0 WATTS OF POWER CAN PRODUCE ELECTROMAGNETIC INTERFERENCE THAT COULD INTERFERE WITH THE OPERATION OF CRUISE AND THROTTLE CONTROLS RESULTING IN VEHICLE "LIMP MODE".

USE OF CELLULAR PHONES WILL NOT INTERFERE WITH THESE CONTROLS.

DUE TO SENSITIVE NATURE OF SIGNALS USED FOR THIS PRODUCT, ALL NON-PLUG AND PLAY CONNECTIONS MUST BE SOLDERED. FAILURE TO COMPLY WITH THIS REQUIREMENT WILL VOID WARRANTY.

Form #5464, Rev. A, 02-06-14
BEFORE INSTALLATION

To make the installation easier, the complete installation instructions should be read through before installation is started.

This installation instruction contains information how to install the Electronic Cruise Control which is not a Do-It-Yourself job.

Modern cars are equipped with electronics which can be costly when damaged by inappropriate treatment.

Rostra Precision Controls can not be held responsible for any error caused by wrong installation.

STOP - READ BEFORE INSTALLATION

IMPORTANT ADVISORY NOTES THAT YOU MUST FOLLOW

Always disconnect the negative cable from battery before installation.

Always use the enclosed installation instruction for installing the Electronic Cruise Control.

Check the part number of the cruise module label is the same compared to the part number of the installation instructions.

Be aware of radio codes that might have to be typed in.

Find a location to install the cruise module and control switch.

If any wires are left, then cut off and insulate.

Only use a multimeter to measure voltage.

Always drive the car for a complete test before reassembling the car.

All wire leads must be soldered.
Brake switch under driver dash connect cruise harness Blue and Brown/White wires to brake switch: cruise harness Blue to Blue of brake switch. Cruise harness Brown/White to Red of brake switch. as shown above.
Ignition Red Wire

PART NUMBER: 250-9508

Electronic Cruise Control Kit

Connect RED wire at IGNITION SWITCH Harness - WHITE 6 PIN Connector PIN #1 RED wire located at key switch.

If Manual Transmission: connect the WHITE wire of cruise harness to negative trigger wire of existing top clutch switch in vehicle. This wire will go to ground only when clutch is pressed. There is no distinctive vehicle wire color listed and will need to be checked with Volt/OHM Meter.

Ground
Connect BLACK ground wire to factory ground located under drivers dash or Drivers kick panel.

Clutch Cancel

NOTE: This cruise uses a universal harness for input circuits, any wires not listed in this instruction for vehicle connection will not be used.
Mount to any flat surface of dash
use template on next page

*Order of placement is not critical

- Solder joint
Notes:

Cut Along Dotted Line
